REPORT OF THE TRUSTEES.

CITY HOSPITAL,
BOSTON, April 30, 1872.

To THE CITY COUNCIL:—

In compliance with the ordinance, the Board of Trustees of the City Hospital respectfully present their Report for the year ending this day, it being the Eighth Report of the Institution under their charge.

The number of patients treated during the year is as follows:—

Patients in the Hospital, May 1, 1871	.	.	.	181
Admitted,—				
Medical	.	.	.	1,527
Surgical	.	.	.	1,109
Ophthalmic	.	.	.	75
Small-pox	.	.	.	162
			—	2,873
				3,054
Discharged	.	.	.	2,584
Died	.	.	.	247
			—	2,831
Remaining in the Hospital at this time	.	.	.	223

Largest number of patients in Hospital at any one time	280
Smallest number of patients in Hospital at any one time	154
Daily average number of patients 206 $\frac{1}{2}$
Average length of stay for each patient	days 25 $\frac{6}{100}$

In the department for out-patients, there have been treated :

Medical patients	2,901
Surgical "	2,778
Ophthalmic "	1,900
Cutaneous "	1,060
Aural "	308
	—
	8,947

The number of visits from them has been as follows : —

Medical	4,689
Surgical	9,096
Ophthalmic	10,319
Cutaneous	2,380
Aural	1,904
	—
	28,388

The reports of the professional staff and the Superintendent, transmitted herewith, contain detailed statements of the cases treated, with the results, together with the cost of maintaining the Hospital, prices paid for the principal articles of consumption, and other interesting and important information.

The whole number of 3,054 patients were in the Hospital, at an average of $25\frac{6}{100}$ days each, 76,533 days, or $10,931\frac{1}{3}$ weeks. The entire expenditure for the year, including everything, excepting only the cost of the boiler-house enlargement, was at the rate of

\$9 64 per week	\$105,347 20
But of the patients enumerated above, 123	
paid for $382\frac{6}{7}$ weeks' board	4,219 83
Leaving, therefore, the sum of	\$101,127 37

as the cost to the city of treating 2,931 patients, for a period of $10,550\frac{1}{2}$ weeks, which is at the rate of \$9 59 per week. The expense of maintaining the out-patient departments,

which is estimated at fifteen hundred to two thousand dollars, has not been deducted in making up this statement.

It will be seen that the daily average number of patients has been largely in excess of any previous year, and that at one time 280 persons were under treatment, being fifty more than can comfortably be accommodated, even if the sex of the patients and classification of diseases are exactly adjusted to the various wards provided for their reception and care. Although a portion of this increase has been caused by the unusual number of cases of small-pox, these being treated in buildings on the water-side of Albany street, the resources of the Hospital proper have been overtaxed to provide a refuge for those seeking relief; the rooms in the centre building, heretofore set apart for paying patients, have been filled with the poor and needy, and beds placed in every available spot in the different departments of the institution, and even then it has been necessary to decline many applications for admission, for want of room.

This condition of affairs has considerably increased the cost of maintaining the Hospital, by the unavoidable outlay for beds and bedding, as well as the expense of supplies and attendants, and has added greatly to the responsibilities and labors of the management and the professional staff. The Trustees desire to call the attention of the Government to the pressing need of increased accommodations and facilities for treatment, if the Hospital is to meet the demands of the rapidly increasing population of the city; and in this connection they feel it their duty to repeat the suggestions made in previous reports regarding the undoubted necessity for the erection of an operating room, conveniently located, and provided with adjacent wards for the reception of patients, before and after operation.

The present accommodations are situated in the dome of the centre building, and it is a positive hardship, and, in many cases, undoubted injury to the patient, to undergo

transportation from the ward to the centre, and then by two separate elevators to the operating room, to be reconveyed, after operation, by the same process, to the starting-point. This is an evil that shculd be remedied at the earliest possible time, in the interests of common humanity.

The sum of ten thousand dollars having been appropriated by the City Council for the erection of an addition to the boiler-house, together with a morgue for the reception and identification of unknown dead, found elsewhere, and a suitable room for the bodies of those dying at the Hospital, the Trustees have caused the work to be completed, and the building is now in use for the purposes for which it was designed.

The duties of the visiting physicians having become excessively laborious, it was deemed for the best interest of the Hospital to increase the number from six to eight, and the positions thus created were filled by the election of Dr. Geo. H. Lyman and Dr. Charles E. Stedman.

Several changes have occurred in the staff since the last report, the resignations of Dr. H. I. Bowditch, Dr. A. D. Sinclair, and Dr. Fitch E. Oliver, as Visiting Physicians, and Dr. D. McB. Thaxter, as Visiting Surgeon, having been presented and accepted. Dr. Hall Curtis and Dr. Wm. Reed have been elected as Visiting Physicians, while the retirement of Drs. Oliver and Thaxter is so recent that no new appointments have been made. Drs. Mackie and Knights having resigned as Physicians to Out-patients, Dr. O. W. Doe and Dr. A. L. Haskins have been elected in their stead.

The Admitting Physician, Dr. H. F. Damon, resigned, and Dr. F. E. Bundy was chosen to fill the vacancy.

During the past year several valuable donations have been made to the library, and it is hoped that friends of the Hospital may continue to send all they can spare from their collections, to lighten the sufferings and shorten the weary hours of pain of the sick and unfortunate.

The various clergymen of the city have kindly conducted the Sunday services, for which the Trustees desire to express their grateful acknowledgments.

The thanks of the Board are eminently due to the Physicians and Surgeons and the Superintendent, for their continued labors and earnest co-operation in all that concerns the interests and successful management of the Hospital.

JOHN T. BRADLEE, *President.*

SUPERINTENDENT'S REPORT.

CITY HOSPITAL, April 30, 1872.

GENTLEMEN OF THE BOARD OF TRUSTEES:—

I herewith present my Annual Report, which comprises the usual statement of current expenses, together with statistical table.

The following table gives the numbers, from year to year, applying for admission and being treated at the Hospital.

	From June 1, 1864, to Dec. 31, 1864.	From Jan. 1, 1865, to Dec. 31, 1865.	From Jan. 1, 1866, to Dec. 31, 1866.	From Jan. 1, 1867, to Dec. 31, 1867.	From Jan. 1, 1868, to Dec. 31, 1868.	From Jan. 1, 1869, to April 30, 1870.	From May 1, 1870, to April 30, 1871.	From May 1, 1871, to April 30, 1872.	Total.
Patients examined by Admitting Physician	459	1,081	1,273	1,838	2,134	3,889	3,366	3,512	17,057
Patients admitted by Admitting Physician	231	696	961	959	1,433	2,311	1,785	1,998	10,424
Patients admitted by Superintendent	244	370	471	515	595	743	611	875	4,424
Patients admitted	475	1,066	1,432	1,534	2,078	3,054	2,306	2,873	14,908
Patients accidentally injured .	129	242	345	328	417	482	525	565	3,033
Number of out-patients treated	371	1,143	3,324	7,015	8,794	11,721	8,899	8,947	50,214

It will be seen that the Institution during the past year has been taxed to its utmost capacity. The crowded state of the wards has been such that all the rooms which have formerly been set apart as private for those who were able and willing to pay, have been occupied by ward patients, while those who have means have been obliged to seek relief elsewhere. That the prosperity and usefulness of the Institution in the past has been all we could expect, we have sufficient evidence from those who have been confided to its care. Over three thousand patients have been treated in the wards during the past twelve months, and nearly fifteen thousand since the Institution was opened to the public, June 1st, 1864. I cannot close without offering a tribute of thanks to the Board of Trustees and Medical and Surgical Staff for their continued consideration.

Very respectfully submitted,

LUCIUS A. CUTLER,
Superintendent.

In presenting their Annual Report, the Physicians and Surgeons believe they may truly say, that, aided by the harmonious co-operation of the Trustees, they have done what they could. They only regret that the benefits to be afforded by the Hospital are still limited by its insufficient accommodations. It provides only imperfectly for the public necessity it was intended to relieve; and ample and immediate enlargement is needed, to render it efficient for its benevolent objects. An overcrowded Hospital becomes a source of danger instead of benefit to its inmates; and the efforts of its Medical Officers are baffled by the inadequacy of the means at their command.

The Medical Staff would therefore once more urge the wants of the Hospital upon the attention of the Trustees and of the City Government. Among these wants may be especially mentioned, — in addition to enlarged accommodations for medical and surgical cases, — a proper amphitheatre for surgical operations, a suitable reception-room for accidents, and provision for lying-in women.

The Staff respectfully renew the suggestion made in their Report of last year, that it would be a great advantage, and great economy, to have an auxiliary establishment, under the control of the Trustees, situated beyond the thickly-settled portion of the city, for the reception of convalescents, who no longer require constant medical treatment, but need nursing and rest and change of air to complete their recovery. The former experience of some of your Medical Officers has satisfied them of the great sanitary advantages offered by Rainsford Island, and the staff believe that the transfer there, from time to time, of such patients as no longer need the costly appliances of the City Hospital itself, would often hasten their restoration to health, while it would also make its wards more largely available for the treatment of other cases of acute disease.

HENRY W. WILLIAMS,
J. NELSON BORLAND,
W. C. B. FIFIELD, } *Committee
of the
Hospital Staff.*

OUT-PATIENTS' DEPARTMENT.

MEDICAL.

IN CHARGE OF DRs. MACKIE AND DOE.

TO THE BOARD OF TRUSTEES, BOSTON CITY HOSPITAL:—

We have the honor to submit the following Report of the Medical Out-Patient Department, for the year ending April 30, 1872.

In presenting this Report, we desire to express our appreciation of the many facilities afforded us for conducting this department, in a manner so satisfactory to ourselves, and so conducive to the best interests of those seeking medical treatment.

We would also express our sincere thanks to Mr. William Baker and to Mr. Henry J. Barnes, who have been so faithful in the discharge of their duties, and to whom we are so greatly indebted for the success that has attended our efforts.

Respectfully submitted,

WM. B. MACKIE, M.D.

O. W. DOE, M.D.

OUT-PATIENTS' DEPARTMENT.

SURGICAL.

IN CHARGE OF VISITING SURGEONS.

BOSTON, April 30, 1872.

TO THE TRUSTEES OF THE CITY HOSPITAL:—

GENTLEMEN,—The Annual Report of the Surgeons to Out-Patients' Department, for the year ending April 30, 1872, is herewith presented.

For several years past the Annual Report of the Surgeons to Out-Patients has iterated and reiterated the complaints of over-crowded rooms, want of ventilation, etc., and these we repeat with increased vehemence, adding thereto another concerning the *Accident Room*. Low, ill-lighted, and ill-ventilated, this room receives the overflow of the out-patients' room. These are often appalled at the sights and sounds seen and heard from the victim of an accident, or from the performance of some operation demanded on the instant. Lighted only from side windows, on cloudy days the operating-tables are moved from their positions to the windows, to afford the surgeons that first necessity, "light." A room where surgical operations are to be performed should be lighted from above.

Lastly, the Accident Room is too near the corridor of the Lower Ward.

Respectfully submitted,

W. C. B. FIFIELD, M.D.,

For the Committee of the Hospital Staff.

TO THE TRUSTEES OF THE BOSTON CITY HOSPITAL:—

GENTLEMEN,—The number of patients treated in the Aural Department of the Hospital, during the past year, was 308, and the number of visits was 1,904.

With the exception of a short time, in midsummer, when ill-health obliged me to be away, the Department has been open regularly, and the attendance more than equal to the accommodation afforded, and I would again call your attention to the incommodious and contracted quarters of the present out-patient building, which afford to this department only a small, insufficiently heated, and badly ventilated ante-room.

The need, also, of some accommodation within the Hospital for the few severe cases which require most careful treatment and nursing, is becoming more and more apparent, and I refer the matter to your consideration, trusting that in any future plans for the relief of the overcrowded condition of the whole Hospital, this may be thought worthy of attention.

Respectfully submitted,

J. ORNE GREEN.

OUT-PATIENTS' DEPARTMENT.

CUTANEOUS DISEASES.

IN CHARGE OF H. F. DAMON, M. D.

TO THE BOARD OF TRUSTEES OF THE BOSTON CITY HOSPITAL:

GENTLEMEN,—In presenting to your Board the Statistical Reports of the Department for the Treatment of Cutaneous Diseases among Out-patients, a few remarks in regard to the condition and prospects of the Department are requisite for a due appreciation of its value to the Hospital, and that portion of the community by which it has been so well attended since its establishment.

During the past year, nearly 1,000 persons (952), and over 1,000 cases (1,060) of cutaneous disease, have been treated by me in this Department; while during the past four years, over 4,000 persons (4,052) and nearly 4,400 (4,397) cutaneous diseases have come under my treatment. Thus, on the average, 1,000 persons have been treated yearly, and 1,100 skin diseases.

During the past year, nearly 2,400 (2,380) visits have been made by patients under treatment for skin diseases; while during the past four years, over 11,000 (11,103) such visits have been made. It will be seen that the number of cutaneous diseases somewhat exceeds the number of persons treated, some persons having two or more distinct cutaneous affections.

Many of those affected with contagious diseases, such as scarlatina and rubeola, have been admitted to the contagious wards of the Hospital; while others, in whom these diseases were mild, have preferred to remain at home, after having been informed of the nature of their cases.

Only the common forms of cutaneous disease have been tabulated; those of rare occurrence are classed amongst the miscellaneous. The tables show the relative frequency of the different diseases in the different months of the year, as ob-

served during the past four years. The precise results in all of these cases cannot be ascertained with certainty; but that they have been generally satisfactory is evident from the improvement of the patients while under treatment, and their option to visit the Department until relief or a cure was effected.

Besides the cutaneous diseases enumerated in the tables, many others of great interest have been seen in the wards of the Hospital, in consultation with the different medical gentlemen in attendance. For these special considerations, I offer them my sincere thanks.

Certain changes have taken place during the past year, which have an important bearing on this Department. My resignation, in February last, of the office of Admitting Physician, has deprived me of the apartments used, not only for admissions, but for cutaneous diseases; and at present there is no suitable place provided for the examination of these latter cases. Indeed, the apartments for out-patients, commodious as they may seem, are in my opinion already inadequate for the accommodation of the numerous applicants for medical aid and special treatment.

I consider it of vital importance, not only for the comfort of those who give their services to the sick in the out-patients' department of the Hospital, but for the patients themselves, who crowd hither for relief, that some measures be taken to afford adequate accommodation to the increased attendance consequent upon the extension of our municipal limits over a vast territory, a large portion of which is without that efficient medical service so accessible to the older parts of the city.

That there are unquestionable advantages in the special treatment of cutaneous as well as ocular and aural diseases, is a point acceded to by all who have the interests of science and humanity in view. That these ends would be better

promoted by more commodious apartments for some of these specialties is a fact apparent to every careful and conscientious observer.

Respectfully submitted,

HOWARD F. DAMON, M. D.

B E Q U E S T S .

Elisha Goodnow, of Boston, by will dated July 12, 1849, makes the City of Boston residuary legatee to his estate, real and personal, for the benefit of a City Hospital. *Provided*, that one-half of the proceeds shall be applied to the establishment and perpetual maintenance of *free beds*, under the control of the government and officers of the said Hospital for the time being.

The following sums of money have been received : —

1862, June 9. From executor's balance of account at Probate Office	\$623 85
1864, April 14. Proceeds of sale of estate on Cross street, containing 6,228 square feet of land	\$14,907 12
Old buildings upon same	223 00
1864, December 31. From City of Boston, for 225 square feet of land taken from above estate to widen Cross street	523 36
	15,653 48
1864, July 1. Interest on same from city to this date	222 67
<i>Amount carried forward</i>	\$16,500 00

	<i>Amount brought forward</i>	\$16,500 00
1867, November 30. From Boston,		
Hartford and Erie R. R. for 5,167		
square feet land taken by New		
York Central R. R. from estate		
on Third street, South Boston		3,875 25
1868, January 1. Proceeds of sale,		
balance of estate on Third street,		
South Boston, 1,516 square feet		758 00
		<hr/>
		\$21,138 25
		<hr/>

1869, January 1. Of the above amount, say \$20,500, is invested in city scrip, interest payable semi-annually, at six per cent. per annum, and deposited with the City Auditor, who is required to receive the interest upon the said scrip, and add the same to the moneys appropriated for the use of the Hospital.

The balance on interest in the hands of the City Treasurer, to be invested as above, is \$633.25.

1868, January. The \$10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows:—

'\$500 to the Penitent Females' Refuge.

\$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

\$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.

Lawrence Nichols, of Boston, by will dated August 19, 1862, and recorded Suffolk Registry of Wills, vol. 160, fol. 140, bequeathed to the City of Boston, towards the support of a City Hospital, the sum of one thousand dollars.

1863, April 29. The executor of Mr. Nichols paid the City Treasurer \$1,000, less the United States tax.	\$937 25
The City of Boston paid interest on same	62 75
	<hr/>
	\$1,000 00

1864, July 1. The above amount, say \$1,000, has been invested in City of Boston scrip, dated July 1, 1864, twenty-years, with six per cent. interest, payable semi-annually, and deposited with the City Auditor, as required by ordinance.

1865, March 14. Received as Residuary Legatee, from the estate of Mr. Nichols, and now in the hands of the Treasurer	\$530 50
	<hr/>

1868, January 1. The Trustees received the sum of two thousand dollars from Hon. Otis Norcross, as the foundation of a fund for the benefit of patients leaving the Hospital, poor and destitute of proper clothing. The principal sum is invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which is to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing in which to leave the Hospital, and having no means of procuring it.

Balance on hand May 1, 1871	\$113 76
Rec'd int. July, 1871	60 00
" " Jan. 1872	60 00
<i>Amount carried forward</i>	<i>\$233 76</i>

<i>Amount brought forward</i>	\$233 76
Expended	128 93
Balance	\$104 83

1870, April 1. The Trustees received from the estate of Mr. Jonas Ball the sum of one thousand dollars for the same purpose, and under the same restrictions as the Norcross fund.

Balance on hand, May 1, 1871	\$60 00
Rec'd int. October, 1871	30 00
" " April, 1872	30 00
	\$120 00

RULES FOR ADMISSIONS AND DISCHARGES, ETC.

Applications for admission of patients shall be made at the Hospital on each day of the week, Sunday excepted, between 9 and 11 A. M.

Whenever able, the patient shall apply in person. When not able to appear in person, application may be made by a friend, and the patient shall be visited by the Admitting Physician, or one of the House Officers.

Any Trustee, or either of the Physicians or Surgeons in attendance may, in case of emergency, send a patient in the first instance to the Hospital by written permit, and the Visiting Committee shall, on the certificate of one of the medical officers designated for the purpose, decide as soon as may be afterwards whether such patient shall remain.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee for the time being, or, in their absence, to that of the Superintendent.

The Visiting Committee, however, shall have the power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted.

Patients discharged on the recommendation of the Physicians or Surgeons shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the consent and approval of the Superintendent, he shall require from any person assuming the responsibility of the removal, a written statement to that effect.

The Superintendent shall not deliver the body of any person dying at the Hospital without a written receipt from the parties taking the same.

In case of the decease of any patient, the Superintendent shall sign a certificate to that effect, and shall furnish the City Registrar with a copy of the same. He shall also state the time and cause of death, the disposition made of the body, whether delivered to friends, or buried from the Hospital. In the last case, he shall mention the place of interment.

Patients may be admitted by the Trustees to the privileges of the Hospital, at such rates of board as they may from time to time determine ; such board being secured by their friends, or by the authorities of the place to which they belong.

In cases where, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

HOUSE RULES.

Patients must be in their proper places in the wards during the visit of the Physicians and Surgeons, and always by 8 P. M., unless specially exempted by the Superintendent.

Those free patients who are able, are expected to assist in nursing, and in such other services as may be reasonably required of them.

Patients shall not leave the Hospital Grounds without a pass from the Superintendent, nor the respective wards without the consent of the nurse in attendance.

No patient shall purchase, or cause any member of the household to purchase for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent; nor shall any officer or servant of the Hospital receive a gift or fee from a patient.

Profane or obscene language, loud talking and incivility, are prohibited.

No patient having acute syphilitic disease, or *mania-à-potu*, shall be admitted as a charity patient, or at a lower rate than twenty-five dollars a week for the former, and fifteen dollars for the latter.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which, in the opinion of the Physician, or Surgeon, are capable of being relieved.

Patients may be visited by clergymen of their own selection; and where there is a wish for the performance of any particular religious rite, it shall be indulged, when practicable.

It is expected that patients will implicitly obey the rules of the Hospital. Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable, shall be by them reported to the Trustees.

All the employés must be in their respective places during their hours of duty. The doors and gates of the Hospital will be closed at 10 P. M., at which time all are expected to be quiet, and those not on duty, in their own rooms.

The use of tobacco, wine and intoxicating liquors is prohibited within the Hospital, unless prescribed by a physician.

VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday and Saturday of each week, from two to three o'clock P. M., friends may be permitted to visit patients, though no patient shall receive more than one visitor on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

All visitors must leave when the bell rings, at the expiration of the visiting hour.

No visitor will be permitted to take any meal in the Hospital, or pass the night therein, without permission from the Superintendent, or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to the patients shall be left with the Superintendent.

NURSES.

Nurses are required to be in their several wards each morning, ready for duty, before the night watchers leave the same.

They shall decide what clothing, or other articles, patients are to retain in the ward, and shall give or allow to be given to patients only such articles of food or drink as may be permitted by the Physician or Surgeon in attendance.
